With four (4) years of active software development experience, I am a results-driven engineer known for leading impactful projects and fostering collaboration in high-growth startup environments. I excel in merging technical expertise with a commitment to excellence and am ready to contribute my skills and leadership to drive success in a new role.

Skills

Languages & Frameworks: Javascript, Typescript, Nextjs, TailwindCSS, GraphQL, Redux toolkit, Jest, Storybook, GSAP, Nodejs
Technologies: Docker, Git, Figma, Adobe illustrator, Wordpress
Others: CI/CD, Agile methodology

Experience

Frontend Developer - Freelance

DEC 2023 - TO PRESENT

- Spearheaded the design and development of a real estate management app using **Next js, React Storybook, TailwindCSS, Auth0**.
- Implemented **role-based access control (RBAC)** for the real estate management app to **enhance security** and tailor user permissions, ensuring secure user experience.
- Developed and maintained several **Astro js, Next js, Vite, Node js, Wordpress websites** for pharmaceutical, real estate and consultancy firms optimizing usability and performance.

Frontend Developer — Earthbroadband LTD, UK (*remote*)

NOV 2022 - DEC 2023

- Using **Nextjs, Typescript, TailwindCSS** and **Jest**, I led the design, development and deployment of a web platform that will eventually sign up over **4000+ customers** for broadband services.
- **Integrated Gocardless APIs** to handle customer recurring subscriptions and payments using react-query.
- Enabled rapid development of products by building a unified design system with **React Storybook**.
- Leveraged **Next js and React-query** for the design and **development of a CRM platform** that

improved the process of customer management and request resolutions.

- Utilized **Typescript, Storybook, Next js, GocardlessAPI and React-query** to develop a robust **customer billing system**; reducing the company's loss to inaccurate billing by over 80%.
- Optimized for performance and accessibility compliance by **lazy loading images and implementing ARIA attributes for screen readers**, resulting in faster loading times and a more inclusive user experience.

Frontend Developer — Switchboo, UK (*remote*)

FEB 2021 - OCT 2022

- Design, developed and maintained a tree planting platform leveraging **Next js, Node js and Stripe** for payment integration for the onboarding of **1000+ customers**.
- Built an interactive 3D visual dashboard with **Three js, React three fiber, Gsap, Javascript**. Where users can view all trees planted and carbon offsets.
- Designed and build robust **APIs** as well as develop efficient database schemas using **PostgreSQL and Prisma**
- Utilized **Figma to design and prototype** innovative features, streamlining the conceptualization and visualization of new functionalities for seamless integration into the product.
- Oversee the design and development of an inhouse **KPI management platform** for employees using **React js, Material UI, and Node js**. This improved the employee's task completion rate.
- Implemented robust **role-based access control (RBAC)** to **enhance security** and tailor user permissions, ensuring our app's streamlined and secure user experience.

Web Developer | Visual Designer — RHIP Factory - Startup studio, NGN

NOV 2015 - MAY 2019

- Collaborated with a team of designers using **Figma, Adobe-illustrator to re-design and prototype** Medic-dispatch an all in one health service platform.
- Redesigned and developed landing pages for web platforms such as Medic-dispatch, Fundeaser, Health-jobber, M-heal using **HTML/CSS, Javascript**.
- Used **Wordpress Elementor** to develop landing page for a Dietary platform, Wellness platforms and JobSeeking platforms
- Created and maintained department web contents using **Wordpress**.

Education

MAR 2008 - FEB 2013

Bachelor of Engineering in Electrical/Electronics Engineering - Modibbo Adama University, Yola, Nigeria
